

Digital Signage Solution

Multiple screens can be connected to IEI digital signage series to display information like flight information at airports, in-store advertising, restaurant menu or movie showtimes. These digital signage players are in compact size with high resolution, stable and easy to install. They are equipped with multiple HDMI ports for a variety of video display monitors. It's the best choice for you to implement in digital signage and video wall applications.

IDS-200 Key Features

■ A Variety of Video Output

The IDS-200 supports AMD's SLS (Single Large Surface) technology which allows four independent HDMI display outputs and a variety of video wall screen combinations. It is the best choice to implement in digital signage or video wall applications.

- Four independent displays (2 x 2 screens)
- Tiled display (2 x 2 screens)
- Tiled display (1 x 4 screens)

*HDMI 2 and 4

When deploying 4 independent video outputs, the monitors connected to HDMI 2 and HDMI 4 connectors must be identical (with the same brand, model number and size).

■ Mounting Method

The IDS series has different mounting ways to choose. The series has passed shock and vibration test based on the MIL-STD-810F standard.
